Answer & Solution

Answer: Option D

No explanation is given for this question **Let's Discuss on Board** (<https://www.examveda.com/which-of-the->)

following-is-a-correct-interface-java-programming-on-interfaces-and-abstract-class-6)

7. Determine output of the following code.

```
interface A { }

class C { }

class D extends C { }

class B extends D implements A { }

public class Test extends Thread{
    public static void main(String[] args){
        B b = new B();
        if (b instanceof A)
            System.out.println("b is an inst
ance of A");
        if (b instanceof C)
            System.out.println("b is an inst
ance of C");
    }
}
```

- A. ☐ Nothing.
- B. ☐ b is an instance of A.
- C. ☐ b is an instance of C.
- D. ☒ b is an instance of A followed by b is an instance of C. ✓

Answer & Solution

Answer: Option D

No explanation is given for this question **Let's Discuss on Board** (<https://www.examveda.com/determine-output-of-the-following-code-java-programming-on-interfaces-and-abstract-class-7>)

8. Given the following piece of code:

```
public interface Guard{  
    void doYourJob() ;  
}  
abstract public class Dog implements Guard{ }
```

which of the following statements is correct?

- A. ☐ This code will not compile, because method doYourJob() in interface Guard must be defined abstract.
- B. ☐ This code will not compile, because class Dog must implement method doYourJob() from interface Guard.
- C. ☐ This code will not compile, because in the declaration of class Dog we must use the keyword extends instead of implements.
- D. ☒ **This code will compile without any errors. ✓**

9. In Java, declaring a class abstract is useful

- A. ☐ To prevent developers from further extending the class.
- B. ☒ When it doesn't make sense to have objects of that class. ✓
- C. ☐ When default implementations of some methods are not desirable.
- D. ☐ To force developers to extend the class not to use its capabilities.
- E. ☐ When it makes sense to have objects of that class.

10. What will be the output?

```
interface A{
    public void method();
}
class One{
    public void method(){
        System.out.println("Class One method");
    }
}
class Two extends One implements A{
    public void method(){
        System.out.println("Class Two method");
    }
}
public class Test extends Two{
    public static void main(String[] args){
        A a = new Two();
        a.method();
    }
}
```

- A. ☐ will print Class One method
- B. ☒ will print Class Two method ✓
- C. ☐ compiles fine but print nothing
- D. ☐ Compilation Error
- E. ☐ None of these
